

- muscle system process
- regulation of ion transport
- regulation of membrane potential
- striated muscle cell differentiation
- sarcomere
- Cardiomyopathies
- Autistic Disorder
- Bipolar Disorder
- second-messenger-mediated signaling
- Seizures
- actin filament-based process
- synaptic signaling
- sensory organ development
- energy derivation by oxidation of organic compounds
- Heart failure
- response to toxic substance
- cellular response to hormone stimulus
- positive regulation of nervous system development
- mitochondrial transport
- calcium ion transport
